ABOUT THE IDEA

“Blogging is an important part of everyone’s life. People use to share their thoughts through images or texts.

It can be anything like about any topic related to data science or related to travelling or food.

BlogNet aims to give a common platform for all kind of data that people want to share with the world.”

APPROACH

Language – JavaScript, Html, CSS.

It is full-stack MERN web application

Technologies - MongoDB, Express, React, Redux and Node js.

Data stored – MongoDB Atlas

Tool – Visual Studio

RESULT

Post has different features like –

- You can attach your images with it.
- You can add the #tags
- You can write it about your topic
- You can submit or clear it
